

K-30

0-0-30

GENERAL INFORMATION:

K-30 is an advanced generation of plant nutrients to enhance nutrient availability and uptake by the plants. **K-30** is a blend of water-soluble plant nutrients for efficient crop use without chloride salts that can be toxic to plants. **K-30** is formulated for crops that require high potassium levels during early or late stage of growth.

GUARANTEED ANALYSIS:

Soluble Potash (K₂O) 30.0%

Derived from potassium carbonate.

DIRECTIONS FOR USE:

K-30 plant nutrients are recommended for use on all plants. It is intended to supplement and enhance a full fertilization program as recommended in accordance with a reliable Soil and Tissue Analysis. **K-30** provides a source of immediately available nutrients but will not, by itself, provide all necessary nutrients required during the growing season. **K-30** is designed for foliar application and for injection through chemigation and sprinkler systems.

Sprinkler Irrigation: Apply at the rate of 0.5 to 1 gallon per acre with irrigation water. Inject **K-30** half an hour before end of irrigation cycle.

Foliar Application: Apply the recommended amount of **K-30** in at least 10 to 25 gallons water per acre.

Corn: Apply 1 to 2 quarts per acre at V6 - V9 stage. Repeat at VT.

Soybeans: Apply 1 to 2 quarts per acre at V5 - V6. Repeat as needed.

Grain Crops: Apply 0.5 to 1 gallon per acre at flag leaf sheath opening or before early boot stage.

Hay/Alfalfa: Apply 0.5 to 1 gallon per acre in early spring. Repeat after each cutting.

Potatoes and Sugarbeets: Apply 0.5 to 1 gallon per acre at 6 to 8 leaf stage or at tuber initiation.

Vegetables: Spray at the rate of 1 quart per acre at the 3 to 4 leaf stage. Repeat every 2 weeks.

TANK MIXING: Fill the tank half full of water, add **K-30** and agitate to dissolve. Add dry formulations and dissolve, followed by liquids. Bring up to volume with water.

Compatibility: **K-30** is compatible with most fertilizers and registered pesticides. However, a compatibility jar test and small plot test is recommended before large-scale treatments are started. Always refer to product label.
