

Solu-PLKS

GENERAL INFORMATION:

Solu-PLKS is a soil conditioner extracted from leonardite ore and biodegradable ingredients. **Solu-PLKS** may help in macro and micronutrients availability for the plants and microorganisms.

Contains Non-plant Food Ingredients.

ACTIVE INGREDIENTS:

Humic Acid 1.0%
Inert Ingredients 99%

Derived from leonardite (humic acid).

DIRECTIONS FOR USE:

Solu-PLKS is recommended for use on all soils and plants. It is designed for soil and foliar application and injection through chemigation and sprinkler systems.

Sprinkler Irrigation: Apply at the rate of 1 to 2 gallons per acre with irrigation water.

Foliar Application: Recommended at the rate of 1 to 2 quarts per acre and dissolve in at least 25 gallons of water per acre.

Aerial Application: Dissolve the recommended amount of **Solu-PLKS** in at least 8 gallons water per acre.

Soil Application: Apply early in the season. Apply in furrow to maximize the nutrients availability.

Potatoes and Sugarbeets: Apply 1 to 2 gallons per acre.

Grain Crops: Apply at the rate of 0.5 to 1 gallon per acre.

Greenhouse Crops: Inject 1 to 2 gallons in drip irrigation system.

Fruit Trees: Apply at the rate of 0.5 to 1 gallon per acre.

Alfalfa: Apply 1 to 2 quarts per acre after each cutting.

TANK MIXING: Fill the tank half full of water, add **Solu-PLKS** and agitate to dissolve. Add dry formulations and dissolve, followed by liquids. Bring up to volume with water. After thorough mixing, allow this mixture to stand for 5 minutes. If the combination remains mixed or can be readily remixed, it is physically compatible. Once compatibility has been proven, use the same procedure for adding products to the spray tank.

Compatibility: **Solu-PLKS** is compatible with most fertilizers. However, a compatibility jar test and small plot test is recommended before large-scale treatments are started. Always refer to product label.

Growers/producers are encouraged to contact their organic certifier before using this product.
