

Herbolyte™ Plus

The ideal liquid adjuvant

1.44-0-0.54

GENERAL INFORMATION:

Designed to enhance herbicide performance, **Herbolyte Plus** supplies a balanced blend of micronutrients as well as modifies spray solution pH and water hardness. The ingredient blend in **Herbolyte Plus** has been found to promote herbicide uptake (such as glyphosate) in agriculture applications. **Herbolyte Plus** is designed to be used with glyphosate products without the adjuvant additions.

Herbolyte Plus advantages include faster weed burndown and active crop growth after glyphosate application while the micronutrient blend assures adequate availability for the crop.

RECOMMENDED USAGE RATES:

Herbolyte Plus usage rate is 16 ounces per acre. Refer to herbicide label for application timing. Add **Herbolyte Plus** to spray carrier before the addition of glyphosate products (follow label rates for herbicide use).
