

Herbolyte™

The ideal liquid adjuvant

GENERAL INFORMATION:

Herbolyte is designed to enhance herbicide performance by modifying spray solution pH and water hardness. The ingredient blend in **Herbolyte** has been found to promote herbicide uptake (such as glyphosate) in agriculture applications. **Herbolyte** is designed to be used with glyphosate products without the adjuvant additions.

The advantage of using **Herbolyte** is reduced treatment cost, faster burndown and the ability to be applied with foliar plant nutrients.

ACTIVE INGREDIENTS:

Hydroxytricarballic Acid 2.0%
Other ingredients 98.0%

DIRECTIONS FOR USE:

Herbolyte use rate is one gallon per hundred gallons of spray solution. The herbicide label would guide application timing. Add Herbolyte to spray carrier before the addition of glyphosate products (follow label rates for herbicide use).

- **Modifies solution pH and water hardness**
- **Promotes herbicide uptake (such as glyphosate)**
- **Improves pesticide efficiency**
- **Easy to mix**
- **Can be mixed with foliar plant nutrients**
