

# BioEnergy+™

## A Soil & Plant Energy Booster

1-1-1

**BioEnergy+™** is a unique blend of nutrients, processed plant materials, spray adjuvants, sugars and extracts from seaweed, yucca and quillaja for use on soils. The sugar works to feed the growth of beneficial microorganisms in your soil that build and maintain higher levels of available nutrients in the soil. Application to crop residue will help speed up the digestion process by the soil microbes which break it down.
