

Manure Master™ Conditioner

A dry manure detoxifying & biological stimulant technology

Manure Master Conditioner's main function is to tie-up toxins in the manure that slows manure microbial digestion. Treating manure with **Manure Master Conditioner** helps reduce pathogens by stimulating beneficial microbes, reducing ammonia release and overall odor, as well as increase decomposition, phosphorus/nitrogen retention and availability. It also aids in the reduction or elimination of top solids and bottom sludge.

INGREDIENTS: Naturally-occurring, unaltered oxidized lignite.

TREATMENT PROTOCOL:

Swine Manure: 500 lbs per million annually. Apply 100 lbs to start and remaining 400 lbs as needed throughout the year (4 treatments).

Dairy/Beef: 1,100 lbs per million annually. Apply 100 lbs to start and 100 lbs monthly or as needed throughout the year (10 treatments).

It is recommended to apply Manure Master Conditioner over the top of the manure, then apply Manure Master™ Plus-PA or Manure Master™ Plus-Organic over the Manure Master Conditioner. It's best to mix into the liquid portion of the manure. Agitation after treatment will enhance the manure digestion. Both products can also be applied in the loadout or manure induction pump.

Make sure the treatment is mixed into the liquid portion of the manure.

ENVIRONMENTAL IMPACT

The premicrobial digestion of liquid manure that has been treated with Manure Master Plus-PA/Manure Master Plus-Organic and Manure Master Conditioner, before field application, may improve soil health and help reduce the likelihood of water quality issues. 100% natural. Safe for animals.

Growers/producers are encouraged to contact their organic certifier before using this product.

It is recommended to use **Manure Master Conditioner** (see treatment protocol) in conjunction with **Manure Master Plus-PA** or **Manure Master Plus-Organic**.
