

Bioactive Liquilife+

Enhance Soil Biology with an Easy-To-Use Liquid

Enhance soil and plant health with one easy to use liquid: **Bioactive Liquilife+**. A 100% plant-based extract, broad spectrum, and multi-species, **Bioactive Liquilife+** is a product manufactured with Purple Cow Organics® patented process. Thousands of fungal and bacterial strains are driven to the soil and plant by Aqua-Yield Technology that shields exudates and metabolites, enhancing the rhizosphere. **Bioactive Liquilife+** is an effective and flexible tool in building soil health and nutrient use efficiency throughout the growing season. Approved for certified organic as well as conventional systems

APPLICATION RATES

In-furrow1-3 gal/A
Foliar1-3 gal/A
Broadcast2-5 gal/A
Residue Management.2-5 gal/A

USE TIPS AND RECOMMENDATIONS

Pressure: Use the largest orifice and reduce pressure to obtain proper application rate. Bioactive Liquilife+ can be used as a stand alone product or mixed with other products such as liquid fish or molasses. Ideal pressure for good coverage and droplet size is 40-50psi. Lower or higher pressure will not adversely effect Bioactive Liquilife+.

Strainers and Filtering: 20 mesh Banjo™ T-Strainer or equivalent. Filter Bioactive Liquilife+ and all tank mixes using a Banjo™ K-Strainer fitted with 20 mesh filter.
