

Water Retractable Device

Natural Water Restoration Technology

The **Water Retractable Device** is a passive water-restoration system designed to help return impaired water bodies toward natural balance. Using mineral activation, microbial habitat support, and kinetic energy technology, the device works continuously to improve water quality without chemicals or mechanical aeration.

Ideal for:

- Farm ponds
- Recreational lakes
- Retention basins
- Golf course water features
- Livestock water sources
- Residential ponds

EXPECTED BENEFITS

- Improved water clarity
- Reduced odor and stagnation
- Enhanced biological balance
- Support for beneficial microbial activity
- Reduced nutrient stress conditions
- Passive, low-maintenance operation

HOW THE TECHNOLOGY WORKS

The device combines three complementary treatment components:

Kiko Kinetic Energy Pellets

- Promote energetic water movement at the molecular level
- Help reduce stagnation conditions
- Support improved oxygen dynamics

Nano Crystalline Mineral Water Conditioner

- Encourages mineral restructuring within the water column
- Supports nutrient balancing and improved water clarity
- Helps stimulate natural biological processes

Biochar

- Provides habitat for beneficial microorganisms
- Assists in nutrient adsorption
- Supports long-term biological stabilization

Together, these technologies encourage the water body to move toward a self-regulating ecosystem.

INSTALLATION INSTRUCTIONS

1. Deploy the Filter Bag

- Submerge the treatment bag 6–8 feet into the water body.
- Secure the attached nylon cord to a stable shoreline anchor point.

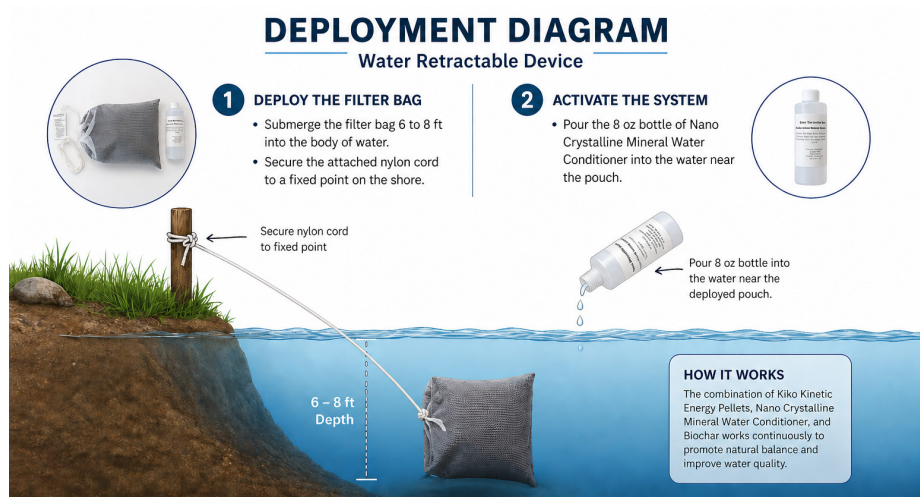

2. Activate the System

- Pour the 8 oz Nano Crystalline Mineral Water Conditioner into the water near the deployed pouch.

The system begins working immediately and requires minimal maintenance.

APPLICATION NOTES

- Best results occur with proper placement in active water zones.
- Multiple units may be recommended depending on water size and condition.
- Safe for fish, livestock, wildlife, and irrigation use.

PASSIVE & CONTINUOUS
Works 24/7

SAFE FOR
Fish, Livestock & Wildlife

NATURAL
No Chemicals, No Aeration

LOW MAINTENANCE
Check periodically and reapply as needed

Water Revitalization technology and Program
TURN GREEN TO CLEAN

A Holistic Water Revitalization Program

Taking a Natural Regenerative Approach to Water Revitalization

Everyone prefers to live around healthy and natural bodies of water. Today, however, a high percentage of water bodies are polluted, containing blue-green algae, bottom sediment, zebra mussels, and often weeds.
